

## Loto ou memory du corps humain

### 1) Préparation :

- Imprimer les 4 planches (celles avec des graphismes en fond).
- Imprimer les 4 feuilles suivantes (celles où il n'y a que les images) et découper chaque image.

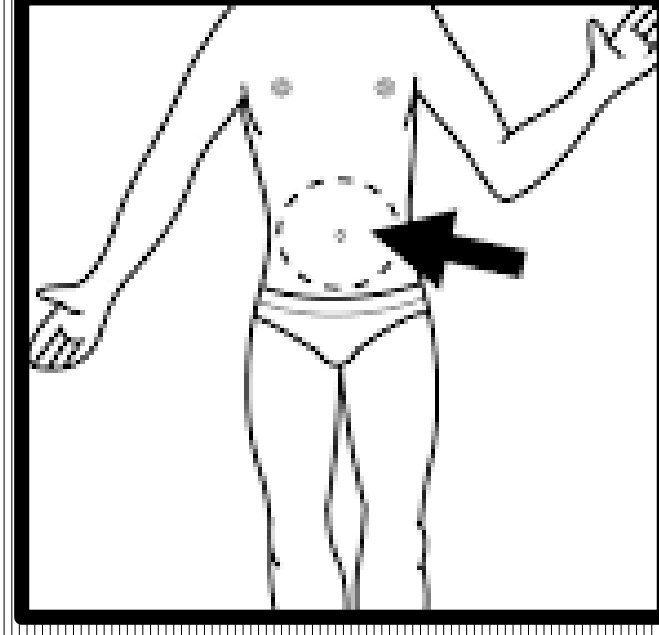

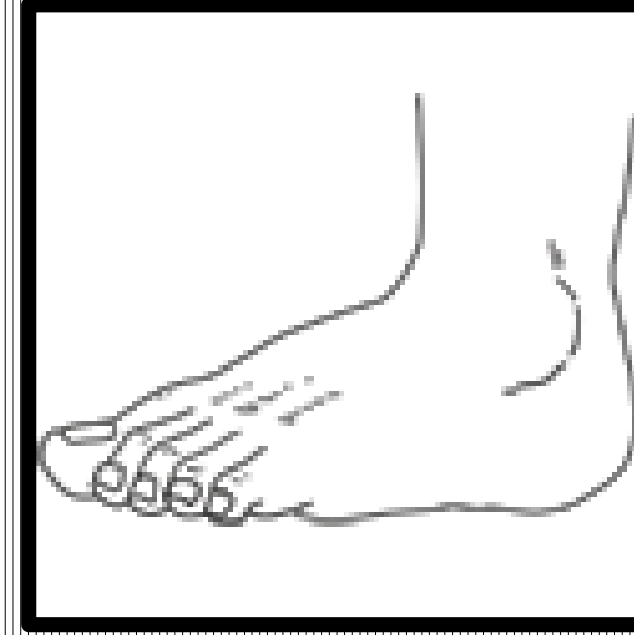

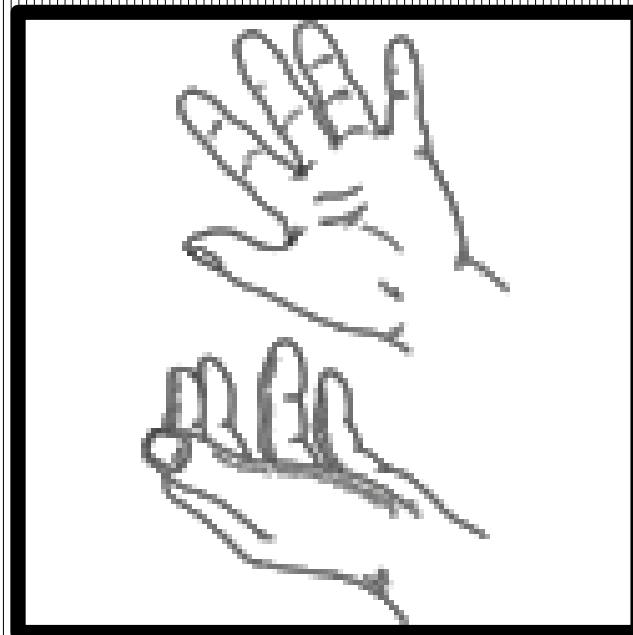

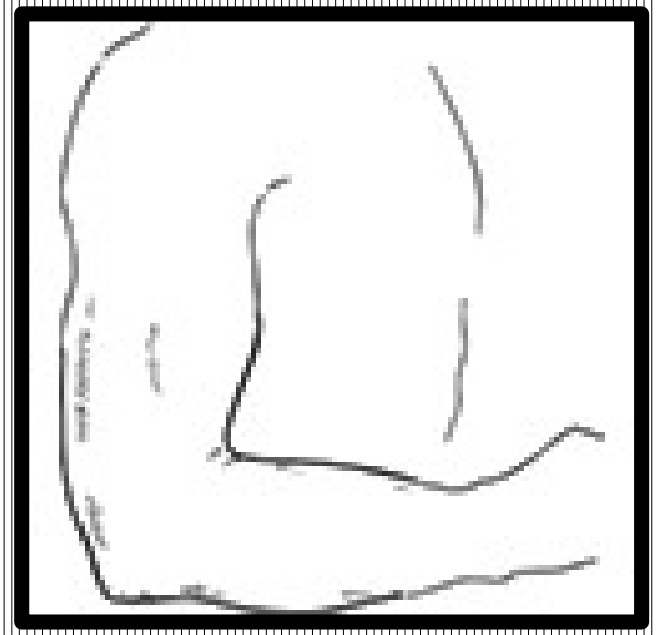

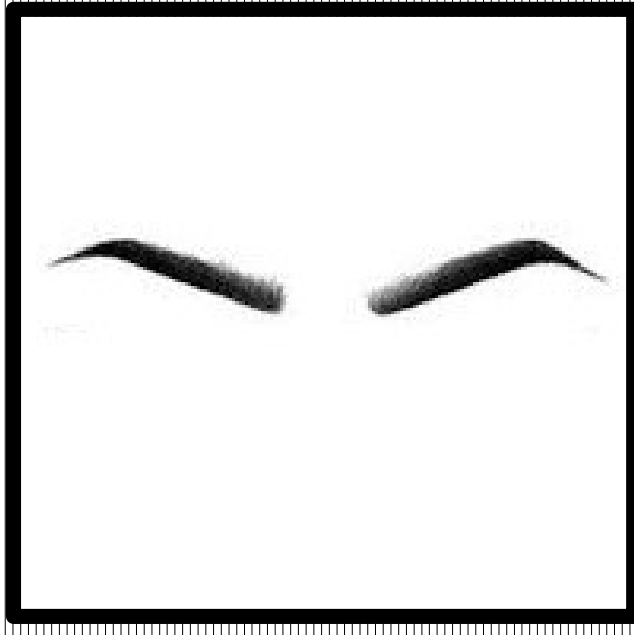

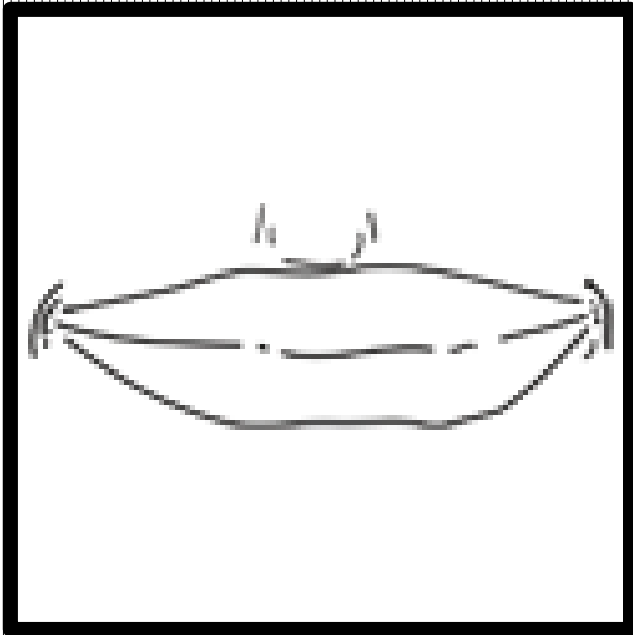

### 2) Nommer les images de sa (ou ses) planche(s).

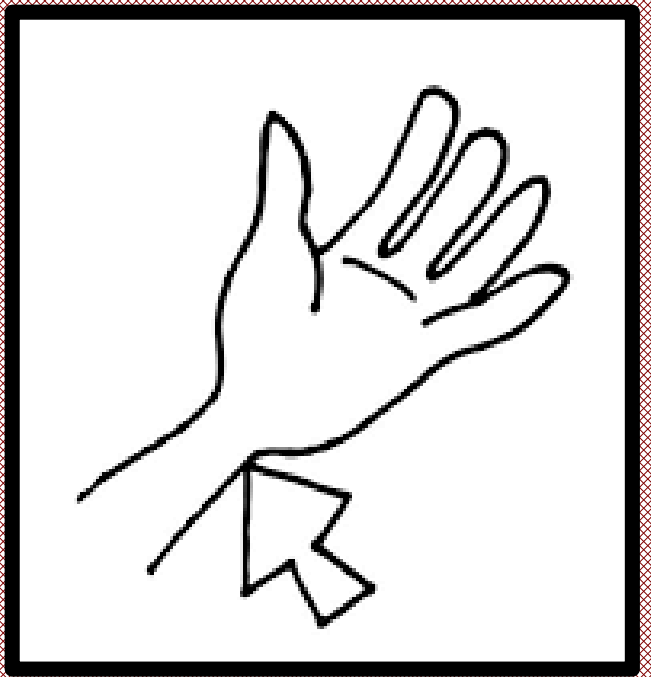

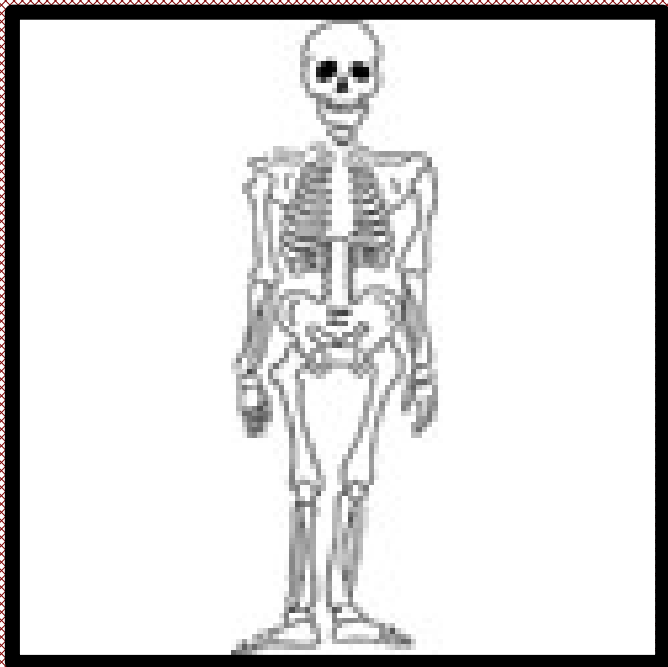

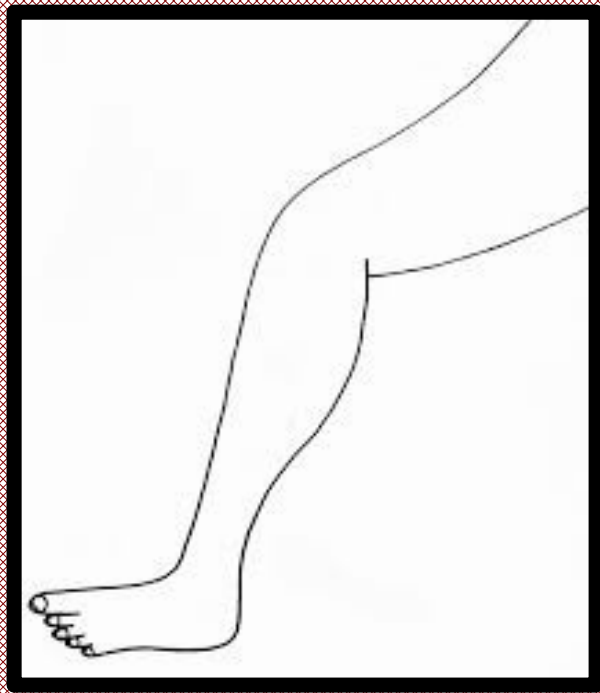

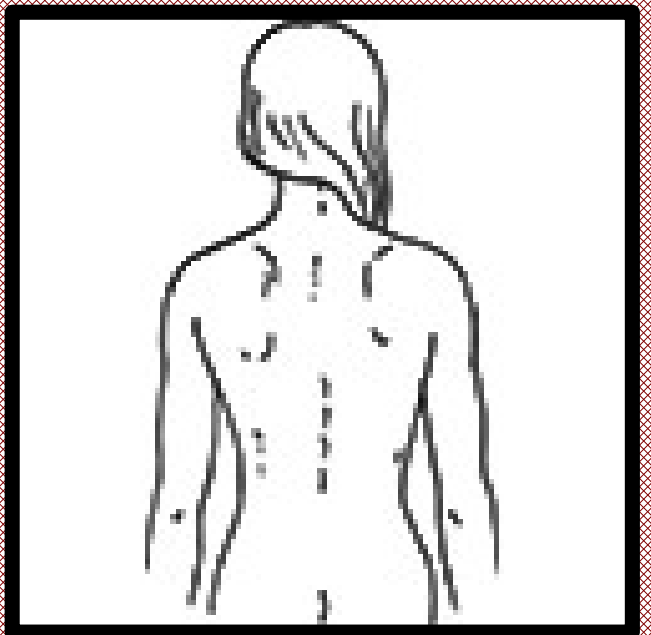

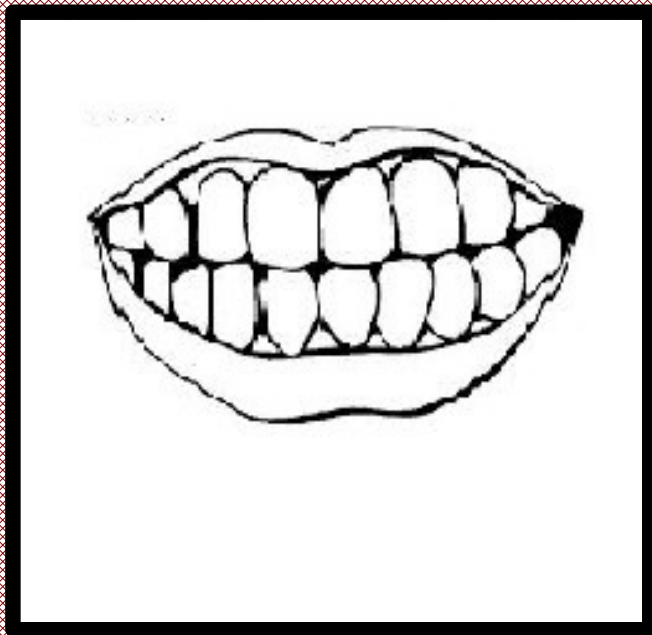

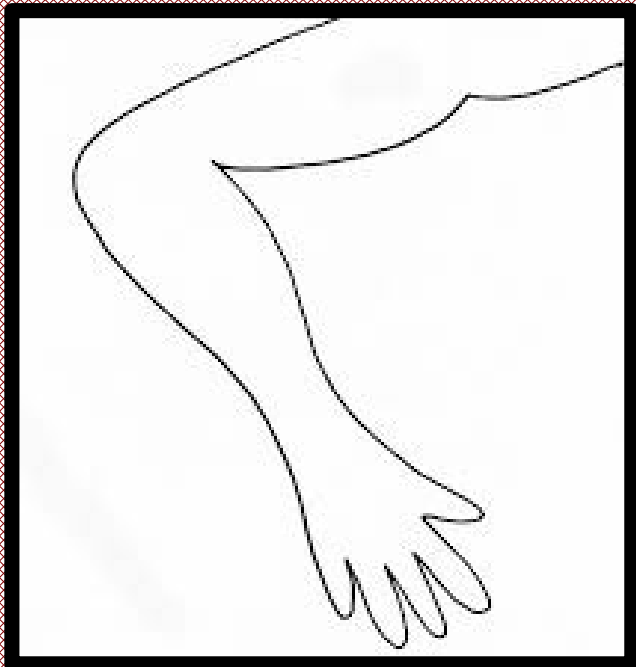

### 3) Pour jouer au memory :

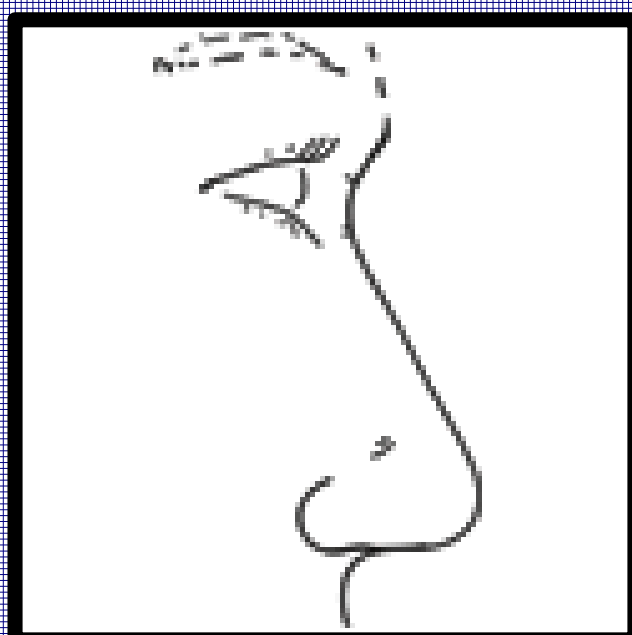

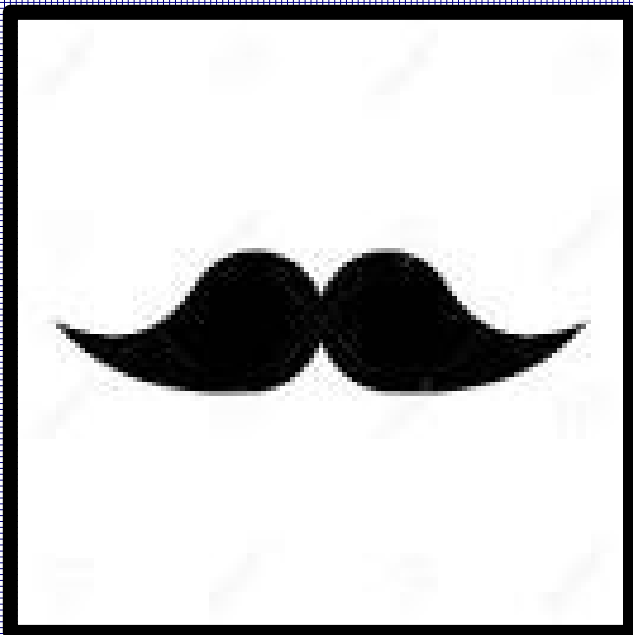

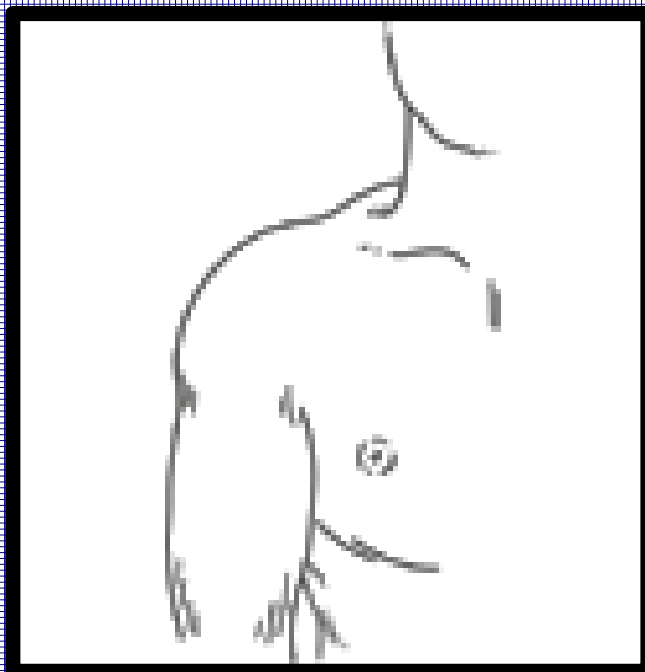

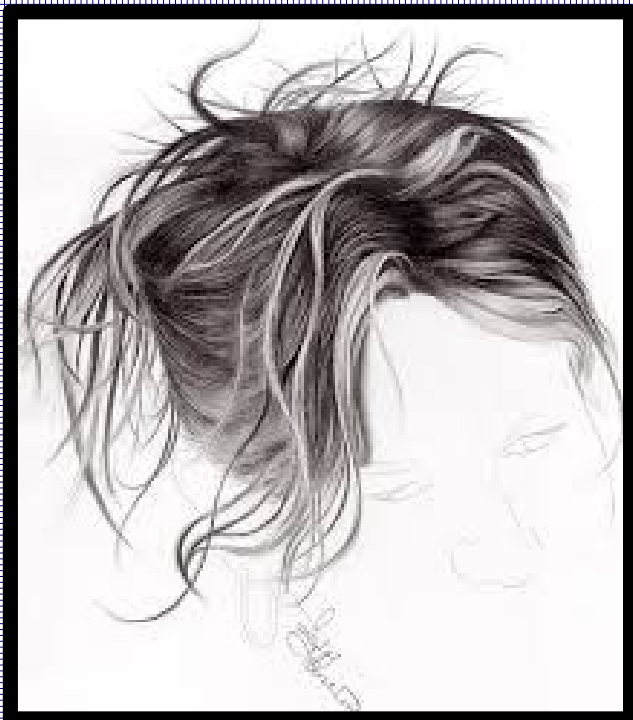

- Mettre toutes les images, faces cachées sur la table. Ceci constitue la pioche.
- Suivant le nombre de joueurs, distribuer une ou deux planches par participant.
- Chacun son tour, piocher une carte. Si cette carte appartient à la planche de celui qui a pioché, il pose l'image sur sa planche, à l'endroit correspondant. Si elle n'appartient pas à sa planche, il la repose dans la pioche (au même endroit où il l'a prise).
- Le gagnant est celui qui a retrouvé l'ensemble des images constituant sa (ou ses) planche(s).

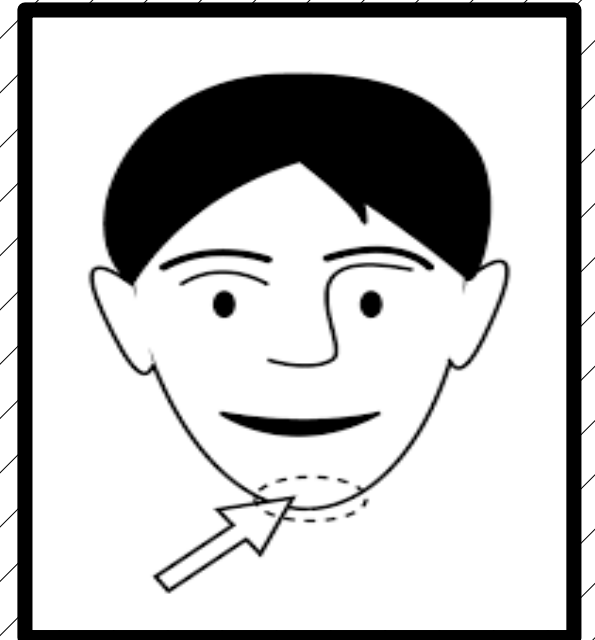

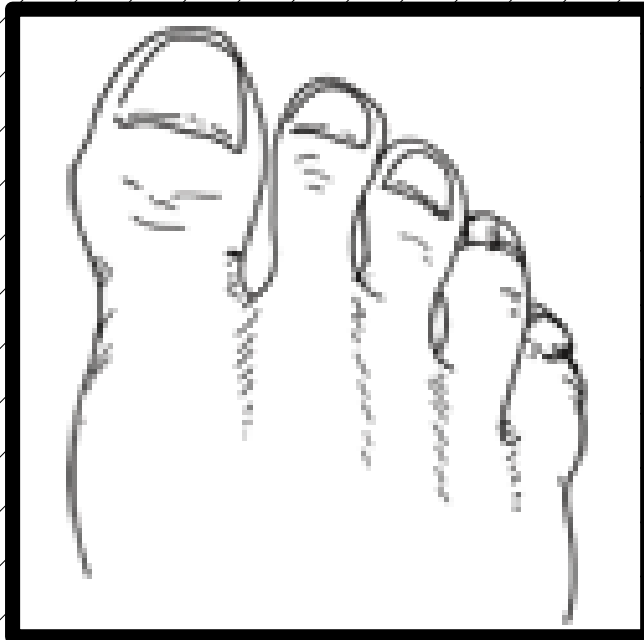

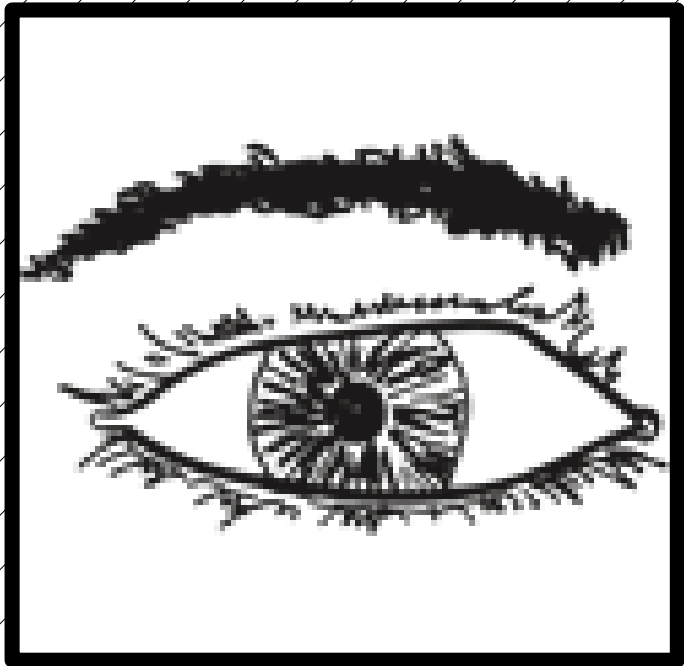

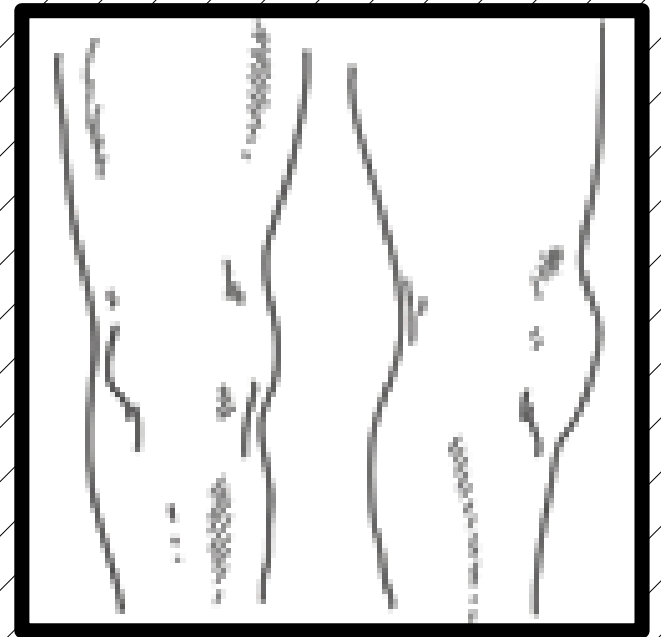

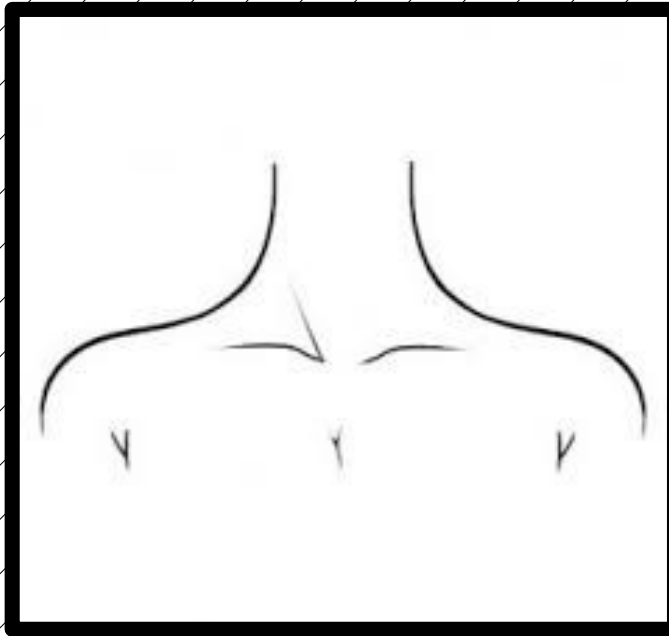

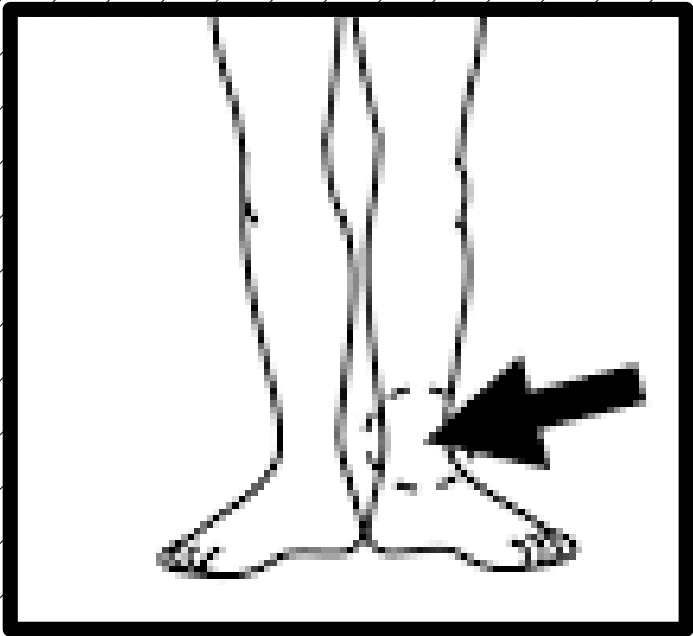

### 4) Pour jouer au loto :

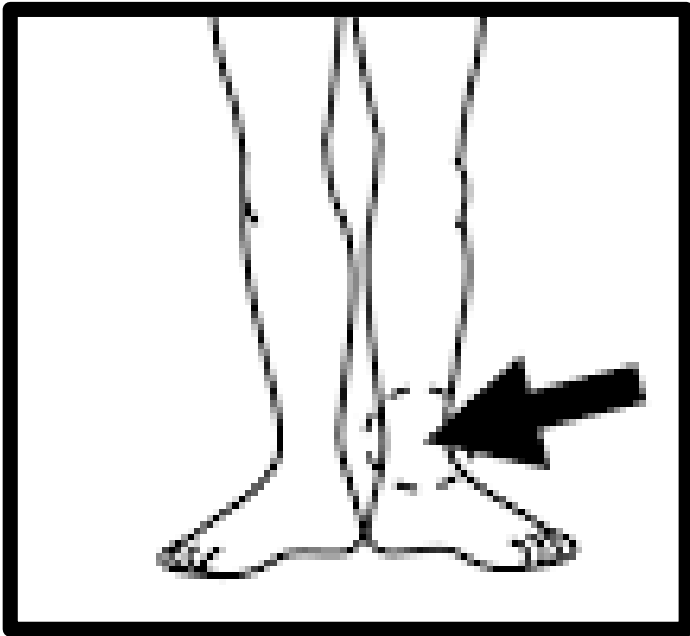

- Au début, un adulte est le maître du jeu. C'est lui qui tire au sort une image de la pioche. Il nomme l'image piochée et les participants doivent chercher si l'image est sur leur planche. Si c'est le cas, il obtient l'image et doit la déposer au bon endroit sur sa planche.
- Le gagnant est celui qui a retrouvé l'ensemble des images constituant sa (ou ses) planche(s).
